## Subject Index

- Atmospheric accumulation aerosol, relationship with haze 251
- Biomonitoring, Japanese cedar bark 239
- Chromium, acute and systemic toxicity 149  
—, analytical chemistry 65  
—, carcinogenicity 159  
—, carcinogenic risk assessment 181  
—, carcinogenic risk assessment criteria associated with inhalation of airborne particulates containing chromium(VI/III) 109  
—, Delaney Clause (U.S.A.) 5  
—, development of revised drinking water standard 43  
—, effects of supplemental Cr 75  
—, environmental chemistry 15  
—, essentiality 75  
—, inorganic chemistry 53  
—, kinetics of transformations in the environment 25  
—, molecular basis of hexavalent chromium carcinogenicity effect on gene expression 113  
—, mutagenicity 131  
—, nutritional chemistry 69  
—, speciation, bioavailability and systemic distribution of Cr in Whetlerite dust 59  
Chromium compounds, role of epidemiological studies in evaluating carcinogenicity 169  
Chromium dioxide dust, inhalation toxicity to rats 83
- DDT, contamination of milk 281  
Delaney Clause (U.S.A.), limitations 5
- HCH, contamination of milk 281  
Heavy metals, use of *Polytrichum formosum* as a passive biomonitor for 289  
Humic substances, effect on transport of hydrophobic contaminants 207  
Hydrophobic contaminants, effect of humic substances on transport in soils 207
- Lead, relationship between concentrations in air and meteorological parameters 265
- Macrofauna bioturbation, influence on nutrient exchange at sediment-water interface 223  
Modelling, three-site sorption model to describe contaminant retention in soil 207
- Nutrient exchange at the sediment-water interface, influence of macrofauna 223
- Organochlorine compounds, concentrations in surface sediments 273
- Polychlorinated biphenyls, concentrations in surface sediments 273  
*Polytrichum formosum*, use as a passive biomonitor for heavy metal pollution 289
- Surface sediments, organochlorine compounds and PCB content 273
- Whetlerite, speciation, bioavailability, and systemic distribution of chromium from 59  
—, speciation of chromium in 53
